

Post Workshop Report

ICARE MEETING 18/10/2022
IDM-Vienna

INTRODUCTION

On behalf of LEAD Healthcare Consultancy - Lebanon, Mr. Ghayth MERHABI (Senior Consultant) attended a seminar in Vienna, Austria at “Institut für den Donauraum und Mitteleuropa (IDM)” between 16 Oct 2022 & 20 Oct 2022 for both projects:

- ICARE Project: Interprofessional, student-run, Primary Care clinics

SUMMARY

Partners from Lebanon, Egypt, Sweden, Austria, Italy, and Estonia joined the seminar. The main objective was to enhance and enrich the curriculum of digital health for medical students. The content elaborated on topics such as E.health, telemedicine, clinical use, risks, limitations, and relevance.

Moreover, new curriculums and formats were suggested to improve the student's skills and competencies to assist them in coping with the future of medicine and nursing. The attendees also discussed the challenges the sector faces and the effective solutions to overcome them.

The given materials were so important and will have a significant impact on future projects since they made every relevant information, challenge, and the solution clear to everyone. Therefore, the seminar served as a major opportunity for the stakeholders to effectively develop the current project for a bigger and more positive impact on the sector.

RECOMMENDATIONS:

- To intensify these in-person meetings during the project phases because of their great importance in exchanging and developing ideas
- To establish a committee to follow up on the results of this meeting

Finally, thank you for inviting LEAD to participate in this seminar, and we are always ready to contribute with partners in achieving the goals of the projects.
