

I CARE

ICARE is a University-Health sector (Enterprise), the main purpose of this Enterprise is to provide effective solutions designed to boost Medical Education and student intership.

* The main target groups of this I CARE project are:

- Students at medical and healthcare science schools at the partner universities
- Academic and non-academid staff
- Enterprises (hospital, health care centers, individual clinics).

Dr.Mosad ZinelDin is an Executive Manager of the I CARE- Student-Led Clinics in Primary Care.

The development of the I CARE “Inter-personal student-led Innovative primary Care Centres (CeHI)” is based on a collaborative process between faculties of (Medicine, Dentistry, Pharmacy, Health Sciences, Nursing and Physiotherapy)

* The main Objective of Professional Study modules:

- to satisfy the needs of LE and EG Healthcare sittings by creating base for educating and training of a new generation of medical and healthcare staff, IT, engineering and research staff.

* The study progrmas includes:

- Thorough knowledge of the general principles of primary care health policies, ethics, equity & legal issues.
- Understanding of the complex Health systems.

* I CARE have the best experts in all sectors such as health, medicl, and offer unique access to specialist expertise and analytical tools.

* I CARE have expert strategists, helping our stakeholders with their most complex strategic challenges.

* The structure of the project and its management has been designed to ensure that its outputs deliver its objectives
